Website

Results-driven professional with experience in Operations Management, Data Analytics, and AI Engineering. Skilled in Python, NextJS, AI/ML/DL, PostgreSQL, Advanced Excel, and Process Automation. Strong analytical and problem-solving abilities with expertise in data analysis, operational reporting, process optimization, and developing technology-driven solutions to improve efficiency and business performance. Experienced in collaborating with cross-functional teams, building data-driven insights, and automating workflows to support informed decision-making and operational excellence.

## Skills:-

**Technical & Engineering:** Python, TypeScript, NextJS, SQL (PostgreSQL), AI Engineering, Deep Learning, Git, Github, Version Control, RAG, LangChain, LangGraph.

**Project & Stakeholder Mgmt:** Project Lifecycle Management, Cross-functional Coordination, KPI Tracking, Stakeholder Reporting.

**Operations/Analysis:** PowerBI, QuickSight, MS Excel (Advance), Throughput Analysis, Process Mapping, SOP Development.

**SoftSkills:** Team Leadership, Ownership & Accountability, Time Management, Problem Solving, Adaptability, Team Mentoring

## PROFESSIONAL EXPERIENCE:-

**Amazon** | (Manager I, Operations Intern)

(March 2026 - Present)

Mumbai, Maharashtra, India

- Led daily floor operations for a fulfillment center(1Lakh sq-ft unit), overseeing workflows for a team of 15–20 associates while consistently supporting throughput targets.
- Analyzed operational and performance data using Python and Advance Excel, identifying process bottlenecks and contributing to a 92 -> 96% improvement in workflow efficiency through data-driven workload balancing and process optimization.
- Contributed to process standardization and operational excellence initiatives, helping maintain high safety and compliance standards across fulfillment center operations.
- Streamlined operational workflows and coordinated with cross-functional departments to efficiently manage peak traffic volumes exceeding 150,000 packages, approximately 25,000 packages per station, ensuring smooth flow, optimal resource utilization.
- Supported capacity planning and departure execution by optimizing workload allocation and operational flow, reducing missed handling from 5% to 2% and improving overall process reliability.

**Siemens** | (Automation Engineering Intern)

(May 2025 - July 2025)

Pune, Maharashtra, India

- Supported continuous improvement initiatives that reduced commissioning time by 20% while maintaining compliance with Siemens quality and safety standards.
- Worked with EMS/SCADA architecture, including real-time data flow and monitoring systems — developing familiarity with industrial control and automation frameworks.
- Assisted in configuration, validation, and testing of simulation processes; identified and resolved inconsistencies to improve system accuracy and reliability.
- Collaborated with 10+ cross-functional stakeholders across engineering, production, quality, procurement, and customer teams to ensure seamless project execution.

**AIESEC** | (Senion Manager Buisness and Branding)

(August 2024 - July 2025)

Pune, Maharashtra, India

- Led the Buisness and Branding team, developing and executing strategies to enhance brand visibility and audience engagement.
- Secured 4 MOUs and 3 SMPs during the financial half-year, achieving a 90% success rate.
- Fostered collaboration within the team, encouraging innovative ideas and ensuring successful execution of Branding initiatives.
- Built and maintained partnerships with stakeholders, contributing to increased brand reach and organizational growth.

## Education:-

- MITWPU, Pune (2026), BTech Robotics and Automation. CGPA:- 8.5
- Sevasadan School, Nagpur, 12th Standard, 80%
- Montfort School, Nagpur, 10th Standard, 82.4%

## Projects:-

**Automated Reporting Tool:** Developed a Python-based tool to automate data processing and report generation, reducing manual effort and improving reporting efficiency.

**AI Crop Health Monitoring:** Developed a computer vision model to detect crop diseases from images and provide automated crop health analysis using AI and deep learning.

**Investment Insights using AI:** Developed an AI-powered platform that analyzes market data and investment portfolios to provide personalized insights, risk assessment, and investment recommendations.

**Robotic Arm for Sorting Metal and Non-Metal:** Developed a robotic arm for automated sorting using metal detection sensors and microcontroller with middleware as ROS2 and simulator as issac-sim.
